

## The 2-cutter for the fastest drilling progress

### ADVANTAGES

- The optimised drill geometry allows for rapid drilling progress, reduced wear and tear, and less effort.
- The centring tip allows for easy and precise drilling and prevents slipping on smooth surfaces.
- The "Power Breakers" on the drill bit head have a "destructive effect". They create micro-cracks in the material and achieve a noticeably improved drilling speed.
- The larger reinforcement chamfers (+35%) guarantee that the drill acts in the best possible way when it hits concrete reinforcements. This considerably reduces the risk of problems caused by drill jamming.
- The new Vario KVS helix offers further benefits: The narrow crown width behind the drill bit head reduces friction and ensures a more powerful transfer of energy during impact drilling. The improved helix allows for an ideal transportation of the drill residue. The spiral shape increases stability and, with it, the break resistance.

### APPLICATIONS

#### To create approval-compliant drill

##### holes in:

- Concrete
- Masonry

##### Also suitable for:

- Natural stone

### FUNCTIONING

- 2 cutter hammer drill bit with SDS-plus drive ensures quick and safe drilling and has been optimized for battery tools.
